2026 届河北专升本全省第一次模拟考试

英语试卷

说明：请将答案填写在答题卡的相应位置上，未在对应的答题区域内或超出答题区域书写的答案无效。在草稿纸、试卷上答题无效。

姓　　名：_____

准考证号：_____

I. Phonetics (5 points)

Directions: *In each of the following groups of words, there are 4 underlined letters or letter combinations marked A, B, C and D. Compare the underlined parts and identify the ONE that is different from the others in pronunciation. Then mark the corresponding letter* ***on the Answer Sheet*** *with a single line through the centre.*

1. A. glove	B. comb	C. control	D. hold
2. A. grand	B. gravity	C. gratitude	D. grateful
3. A. excuse	B. excel	C. except	D. exist
4. A. chocolate	B. character	C. children	D. choice
5. A. husband	B. system	C. society	D. insist

II. Situational Dialogue (10 points)

Directions: *In this section there is a long dialogue with 5 missing sentences. At the end of the dialogue, there is a list of given choices. You are required to select the ONE that best fits into the dialogue. Then mark the corresponding letter* ***on the Answer Sheet*** *with a single line through the centre. Note that there are two additional choices and you can not use any of the choices in the list more than once.*

A: Hi, Li Ming. You look so busy these days. What are you doing?

B: Hi, Wang Ying. ___6___ I want to enter a good high school.

A: I understand. But you should also take care of yourself.

B: Thank you. I will. By the way, ___7___

A: My plan? Well, ___8___ It's a two-week English summer camp in Beijing.

B: Oh, Beijing is a great place. ___9___

A: Thanks! I think it can not only improve my English but also help me make more friends.

B: ___10___

A: Yes. And if you go with me, we can practice English together every day.

B: That's a good idea. Let me think about it and I'll tell you later.

A: OK.

A. What's your plan for the summer vacation?

B. But I'm not sure if I can get good grades in the exam.

C. I hope you can have a wonderful time there.

D. Would you like to go with me?

E. I'm going to take part in a summer camp.

F. That sounds really interesting and meaningful.

G. The exam is coming soon, so I have to study hard.

III. Reading Comprehension (50 points)

Section A (30 points)

Directions: *There are 2 passages in this part. Each passage is followed by some questions or unfinished statements. For each of them there are 4 choices marked A, B, C and D. You are required to choose the ONE that best fits into the statement. Mark the corresponding letter* ***on the Answer Sheet*** *with a single line through the center.*

Passage 1

Questions 11-15 are based on the following passage.

Millions of people are using cell phones today. In many places it is actually considered unusual not to use one. In many countries, cell phones are very popular with young people. They find that the phones are more than a means of communication—having a mobile phone shows that they are cool and connected.

The explosions around the world in mobile phone use make some health professionals worried. Some doctors are concerned that in the future many people may suffer health problems from the use of mobile phones. In England, these has been a serious debates about this issue. Mobile phone companies are worried about the negative publicity of such ideas. They say that there is no proof that mobile phones are bad for your health.

On the other hand, why do some medical studies show changes in the brain cells of some people who use mobile phones? Signs of change in the tissues of the brain and head can be detected with modern scanning（扫描）equipment. In one case, a traveling salesman had to retire at a young age because of serious memory loss. He couldn't remember even simple tasks. He would often forget the name of his own son. This man used to talk on his mobile phone for about six hours a day, every day of his working week, for a couple of years. His family doctor blamed his mobile phone use, but his employer's doctor didn't agree.

What is it that makes mobile phones potentially harmful? The answer is radiation. High-tech machines can detect very small amount of radiation from mobile phones. Mobile phone companies agree that there is some radiation, but they say the amount is too small to worry about.

As the discussion about their safety continues, it appears that it's best to use mobile phones less often. Use your regular phone if you want to talk for a long time. Use your mobile phone only when you really need it. Mobile phones can be very useful and convenient, especially in emergencies. In the future, mobile phones may have a warning label that says they are bad for your health. So for now, it's wise not to use your mobile phone too often.

佳鑫诺专升本 STANDARD SETTER IN HEBEI PROVINCE

11. People buy cell phones for the following reasons EXCEPT that_____.

A. they're popular.　　B. they're useful.

C. they're convenient.　　D. they're cheap.

12. The word detected in paragraph 3 could be best replaced by_____.

A. cured　　B. removed

C. caused　　D. discovered.

13. The salesman retired young because_____.

A. he disliked using mobile phones.

B. he couldn't remember simple tasks.

C. he was tired of talking on his mobile phone.

D. his employer's doctor persuaded him to.

14. On the safety issue of mobile phones, the manufacturing company_____.

A. deny the existence of mobile phone radiation.

B. develop new technology to reduce mobile phone radiation.

C. try to prove that mobile phones are not harmful to health.

D. hold that the amount of radiation is too small to worry about.

15. The writer's purpose of writing this article is to advise people_____.

A. to buy mobile phones.

B. to update regular phones.

C. to stop using mobile phones.

D. to use mobile phones less often.

Passage 2

Questions 16-20 are based on the following passage.

When you think about math, you probably don't think about breaking the law, solving mysteries or finding criminals. But a mathematician in Maryland does, and he has come up with mathematical tools to help police find crooks.

People who solve crimes look for patterns that might reveal the identity of the criminal. It's long been believed, for example, that crooks will break the law closer to where they live, simply because it's easier to get around in your own neighborhood. If police see a pattern of robberies in a certain area, they may look for a suspect who lives near the crime scenes. So, the farther away from the area a crime takes place, the less likely it is that the same criminal did it.

But Mike O'Leary, a mathematician at Towson University in Maryland, says that this kind of approach may be too simple. He says that police may get better clues to the location of an offender's home base by combining these patterns with a city's layout and historical crime records. The records of past crimes contain geographical

information and can reveal easy targets — that is, the kind of stores that might be less difficult to rob. Because these stores are along roads, the locations of past crimes contain information about where major streets and intersections are. O'Leary is writing a new computer program that will quickly provide this kind of information for a given city. His program also includes census, or survey, information about the people who live in the city, and information about how a criminal's patterns change with age. (It's been shown, for example, that the younger the criminal, the closer to home the crime.) Other computer programmers have worked on similar software, but O'Leary's uses more math. The mathematician plans to make his computer program available, free of charge, to police departments around the country.

The program is just one way to use math to fight crime. O'Leary says that criminology — the study of crime and criminals — contains a lot of good math problems. ―I feel like I'm in a gold mine and I'm the only one who knows what gold looks like," he says. ―"It's a lot of fun."

16. Which of the following statements about math is true?

A. It is too difficult for the police to use in finding criminals.

B. Few people associate it with finding criminals.

C. Some criminals make use of it when committing crimes.

D. it has long been employed in solving crimes.

17. People tend to think there is a relationship between_____.

A. the time of a crime and the age of the criminal.

B. the type of a crime and the identity of the criminal.

C. the pattern of a crime and the equipment of the criminal.

D. the location of a crime and the residence of the criminal.

18. O'Leary includes all the following information in writing his program EXCEPT_____.

A. the records of past crimes.

B. the locations of police bureaus.

C. the people living in the city.

D. the change of a criminal's patterns with age.

19. O'Leary's program is different from other similar software because_____.

A. it is inexpensive.

B. it is more user-friendly.

C. it uses more math.

D. it is available all over the world.

20. It can be inferred from the last paragraph that O'Leary_____.

生益诺专升本
STANDARD SETTER IN HEBEI PROVINCE

A. will develop programs for other governmental departments.

B. is going to use math in looking for gold.

C. thinks it's interesting to learn math.

D. will further use math in studying crimes and criminals.

Section B (20 points)

Directions: *In this section there is a passage with 10 blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choice. Each choice in the blank is identified by a letter. Please mark the corresponding letter* ***for each item on the Answer Sheet*** *with a single line through the center. You may not use any of the words in the bank more than once.*

"Don't take many English courses; they won't help you get a decent（得体的）job." "Go to a management classes, so you'll be ready to join the family business when you graduate."

Sound___21___? Many of us have heard suggestions like. Such comments（评论）often seem quite reasonable. The___22___should be taken with caution. The reason is that they relate to decisions you should___23___. You are the one who must live with their consequences（结果）.

One of the worst reasons to follow a particular path in life is that other people want you to. Decisions that affect your life should be your decisions— decisions after you make you've considered everything and ___24___the path that suits you best.

Making your own decisions does not mean that you should___25___the suggestions of others. For instance, your parents do have their own experiences that may make their advice helpful, and they___26___in a great deal of your personal history, they may have a clear view of your___27___and weaknesses. They may still see you as a child, in need of care and protection. Or they may see only your strengths（优点）. Or, in some___28___cases, they may focus only on your___29___ .

People will always be giving you advice. ___30___, though, you have to make your own judgments.

A. advantages	D. ultimate	G. have	J. taking	M. suggestions
B. ignore	E. participate	H. chosen	K. Finally	N. familiar
C. unfortunate	F. disadvantages	I. greatly	L. make	O. unfortunately

IV. Cloze (20 points)

Directions: *There are 10 blanks in the following passage. For each blank there are 4 choices marked A, B, C and D. You are required to choose the ONE that best fits into the passage. Then mark the corresponding letter* ***on the Answer Sheet*** *with a single line through the centre.*

In China, children like to make promises by hooking pinkies (拉钩) with each other. They say, "A pinkie promise must be ____31____ for 100 years." Then they may press their thumbs (拇指) together to complete the promise. Sometimes, ____32____ will hook pinkies and promise to be together forever.

There are many guesses on the origin of the pinkie promise. Some say it comes from a nursery rhyme (童谣). ____33____ say it was introduced from the West—born out of a love story where a man and a woman hooked fingers.

One theory is that it may have ____34____ to do with the role of fingers in Chinese culture. The Chinese character for "finger" also means "aim" (referring to people's thoughts). So hooking fingers can be seen as the exchanging of ____35____.

Therefore, the fingers play a(n) ____36____ role in making an oath (盟约): They can not only be used to complete a promise, but also be cut for making a blood oath. When someone swears to heaven (对天发誓), he uses his ____37____ to point to the sky.

____38____, hooking fingers means making a serious promise. In some movies, a person who breaks a promise may have his little finger cut ____39____! Of course, this kind of thing is not very likely to happen in real life. But we can still see ____40____ important "pinkie promises" can be. So next time,when you hook pinkies with someone, you'd better be careful with your promise!

31. A. recorded	B. kept	C. remained	D. held
32. A. enemies	B. cousins	C. couples	D. scientists
33. A. The other	B. Another	C. Others	D. Other
34. A. something	B. anything	C. everything	D. nothing
35. A. differences	B. gifts	C. thoughts	D. problems
36. A. ancient	B. important	C. pleasant	D. crowded
37. A. finger	B. hand	C. shoulder	D. stomach
38. A. Generally	B. Suddenly	C. Simply	D. Possibly
39. A. up	B. down	C. off	D. behind
40. A. what	B. how	C. when	D. where
