河北省2025年普通高校专科升本科教育选拔考试

英语 试卷

(考试时间：60分钟 满分：100分)

I. Phonetics (5 points)

Directions: *In each of the following groups of words, there are 4 underlined letters or letter combinations marked A, B, C and D. Compare the underlined parts and identify the ONE that is different from the others in pronunciation. Then mark the corresponding letter* ***on the Answer Sheet*** *with a single line through the centre.*

1. A. match	B. balance	C. danger	D. international
2. A. heavy	B. breathe	C. season	D. cheap
3. A. pride	B. surprise	C. flight	D. bridge
4. A. lamb	B. club	C. climb	D. debt
5. A. explained	B. hoped	C. changed	D. dreamed

II. Situational Dialogue (10 points)

Directions: *In this section there is a long dialogue with 5 missing sentences. At the end of the dialogue, there is a list of given choices. You are required to select the ONE that best fits into the dialogue. Then mark the corresponding letter* ***on the Answer Sheet*** *with a single line through the centre. Note that there are two additional choices and you can not use any of the choices in the list more than once.*

Li Hua: Hi, Wang Jun. What are you doing?
Wang Jun: ___6___
Li Hua: You always sit inside playing games and going online. When was the last time you had a day without going online?
Wang Jun: I don't know. Probably six months ago.
Li Hua: You should go out more. I'm meeting some friends for coffee now. Why don't you come?
Wang Jun: Thanks, but I'm fine here.
Li Hua: OK. __7___
Wang Jun: Um. I went to Liu Ming's birthday party four weeks ago.
Li Hua: And you haven't been out since then?
Wang Jun: No. I don't really enjoy it. I get nervous.
Li Hua: __8___ We're going for dinner. How about joining us?
Wang Jun: That's my worst nightmare! I feel nervous sitting in a small group making conversations.
Li Hua: You could do something where you don't have to talk too much. You are a good football player. __9___
Wang Jun: Actually, that sounds like a good idea.
Li Hua: OK, I'll pick up some information for you. Also, we're going to see the new movie Nezha II on Sunday.
Wang Jun: __10___ I do need to get out more! Thank you.
Li Hua: Welcome.

A. When was the last time you went out with friends?
B. That's why I do it online.
C. I'd like to see that.
D. Why don't you join the college club?
E. I'm going out with some people from our course on Saturday.

F. Which one do you like better?
G. I'm just playing an online game.

III. Reading Comprehension (50 points)

Section A (30 points)

Directions: *There are 2 passages in this part. Each passage is followed by some questions or unfinished statements. For each of them there are 4 choices marked A, B, C and D. You are required to choose the ONE that best fits into the statement. Mark the corresponding letter* ***on the Answer Sheet*** *with a single line through the center.*

Passage 1

Questions 11-15 are based on the following passage.

Diamond is the hardest material on Earth. Yet, gem cutters shape them. If diamonds are so hard, how do they cut them into shape? They use other diamonds of course!

Not all diamonds are the same. Some are harder than others. The hardness of a diamond depends on two things: its purity and its structure. Let's discuss purity first.

Diamonds come in many colors: grey, white, yellow, blue, pink, purple, orange and black.
Red diamonds are the rarest of all. This makes them worth a lot of money. Yet, pure diamonds are colorless. They are all carbon. They are transparent like glass.

Colors found in diamonds come from impurities. They have another element besides carbon. They have a carbon defect. For example, yellow diamonds have nitrogen in them. The nitrogen is yellow. Blue diamonds have boron trapped in their crystal structure. The boron is blue.

The purity or color of a diamond is important to its hardness. Pure diamonds are harder than impure diamonds. But purity isn't the only thing that matters. Structure also affects hardness.

The carbon atoms in a diamond are arranged in a crystal structure. Some crystal structures are perfect. A diamond with a perfect crystal structure is harder than one with flaws. So pure, colorless crystal diamonds are the hardest of all.

Good gemstones should be hard. This is what makes diamonds so great for jewelry. Some gems, such as azurite, are soft and easy to scratch. Azurite looks pretty, but it will scratch if worn daily. Diamonds do not scratch easily. Only a diamond can scratch another diamond.

That's why you can wear a diamond ring while doing chores, if you want. The gem will not need polishing. Just don't go fist bumping other people with fancy engagement rings. It will end badly.

11. What are the two factors that determine a diamond's hardness according to the passage?
    A. Structure and shape.
    B. Color and shape.
    C. Purity and structure.
    D. Purity and color.
12. Why are red diamonds worth so much money?
    A. They have the highest purity of all diamonds.
    B. They are the rarest of all diamonds.
    C. They are soft and easy to shape.
    D. They are the hardest diamond of all.
13. Which type of diamond does not have a carbon defect?
    A. Red diamond.
    B. Blue diamond.
    C. Yellow diamond.
    D. Pure diamond.

14. Which of the following statements is TRUE according to the passage?
    A. Azurite is much harder than diamond.
    B. Diamond is much prettier than azurite.
    C. Azurite is much prettier than diamond.
    D. Diamond is much harder than azurite.
15. In this passage, the author is trying to _____
    A. explain features of diamonds.
    B. persuade readers to purchase diamonds.
    C. describe how diamonds are mined.
    D. argue that diamonds cost too much money.

Passage 2

Questions 16-20 are based on the following passage.

Imagine that you get an email one morning. You click the link in the email. It takes you to a site that looks very much like your bank's. You enter your username and password. You submit the form. You've just been phished!

Phishing is a type of attack that happens over the Internet. Users receive an email or text message that seems like it came from a trusted source. These users are being cheated. They are interacting with dangerous hackers. The attackers copy trusted companies. They send users to web pages that look like the ones we use every day. When users login or provide sensitive information, the attackers steal this data.

Attackers want your data for many reasons. They may use your data to commit identity fraud. This is when they use your identity to buy something with your credit. Then they receive the goods and you receive the bill. Or they may want your password to take over a computer network. They may want access to private emails. They may want customer records. They gain access by tricking people into giving them their login information.

Phishing attacks are dangerous, but you can spot them if you pay attention. One thing to watch is your address bar in your browser. Attackers use domains that look like the ones that we trust, but they are not the same. If you are unsure, search for the site and login from the root domain.

An even better way to secure your account against phishing attacks is to use 2FA: two factor authentication. 2FA means that your account is secured with two keys. The first is your password. The second key is a random code that changes every few minutes.

Phishing attacks are scary and common. The reason why they are common is that they are effective. Many people accept appearances with no doubt. Browsing the Internet safely requires a healthy amount of suspicion. Nobody is trying to give you free money.

STANDARD SETTER IN HEBEI PROVINCE

16. How do phishing attackers obtain users' data?
    A. When users receive an email from the attackers.
    B. When users are interested in the web pages.
    C. When users login or provide sensitive information.
    D. When users click the link in an email from the attackers.
17. Which is NOT a motive or reason for phishing mentioned in the passage?
    A. To steal customer records.
    B. To commit identity fraud.
    C. To gain control of someone else's computer network.
    D. To attack the dangerous hackers.
18. What is the main idea of Paragraph 4?
    A. To describe the reasons for phishing attacks.
    B. To teach readers how to spot phishing attacks.
    C. To help users design their passwords.
    D. To tell readers phishing attacks happen every day.

19. How can 2FA protect users from phishing attacks?

A. Users need two keys to login, and the user can't give away one of the keys.

B. The attacker needs a fingerprint or eyeball scan to access the account.

C. Nobody can log into the account under any circumstances.

D. Two people have to approve the login, so the attacker can't do it alone.

20. Which of the following statements is TRUE according to the passage?

A. Every phishing attack involves deleting the victim's identity to commit fraud.

B. In a phishing attack, an attacker controls a victim with a stronger computer.

C. You should check your bank account carefully before submitting your data.

D. If a phishing attack is successful, users willingly give attackers sensitive data.

Section B (20 points)

Directions: *In this section there is a passage with 10 blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choice. Each choice in the blank is identified by a letter. Please mark the corresponding letter* ***for each item on the Answer Sheet*** *with a single line through the center. You may not use any of the words in the bank more than once.*
